

Legal Library 2007 Word 2007 Primary Interop Assembly Installation Instructions

Download the Primary Interop Assembly from the link provided on the Legal Library 2007 page. Save the "PrimaryInteropAssembly.exe" to the 'Desktop'. Then click 'Run'.

Next you will need to extract files to your system. Save them to your 'Desktop'. Then you will find three new files on your 'Desktop':

- o2007pia.msi
- o2007pia_readme.rtf
- eula.txt

Now you want to double-click on the, "o2007pia.msi" file.

Step through the Installation program, once the installation prompts disappear, Open Word, then click on the "Office button" (in the upper left hand corner) then click Word Options, Add-ins. Next, click on the drop-down menu and select 'disabled items' then click 'Go'. Select the item that has 'legal library' in it, then click, 'enable' then close. Now click the drop-down menu again and select, 'Com add-ins' then click, 'Go'. Then put a check mark in the box next to Legal Library by left clicking in it. Then click, 'Ok'. Now click close.

Now you should have access to the Legal Library button on the far right of the Word Ribbon.
